CULTURE 21 PLUS

Culture 21 Plus is the new guide that the UCLG Culture Committee is shaping as the frame and toolkit for local cultural policy-making in the next years. This is a co-creation process, involving cities and local governments worldwide. This frame is based on the experiences of cities and regions drawn from the implementation of Culture 21 Actions since 2015, and also considers the changes that have taken place in local and global contexts. The initial proposal of Culture 21 Plus comprises a series of blocks, areas and concrete actions that explore the connections between culture, cultural rights and other fields of local action, in order to position culture as a driver of citizenship and sustainable development of a territory. The tool allows two possible uses: (1) to carry out a self-assessment of the state of play of the cultural policies of a territory; (2) to design local cultural strategies based on cultural rights and sustainability.

Until the official adoption and publication of the Culture 21 Plus in 2025, and with the aim of building this new guide in a very participatory manner, tests of the guide are being carried out in interested cities to gather their contributions, suggestions and observations, and improve the draft on the basis of local knowledge and experience. Jinju, Mexico City, Lisbon, Elefsina and Esch-sur-Alzette already took a test. Join them!
